International Space Station fly over schedules on Web

If you want to see the International Space Station fly over Huntsville, a complete schedule of when it will be visible during November is available on "Inside Marshall." The schedule gives the times when the Station will rise in the night sky, which direction to look, the Station's highest point, and the time and direction it will disappear over the horizon. An average overhead pass lasts about 11 minutes. The Station is easy to spot, even in the city, since it is the fourth-brightest object in the sky. Only the Sun, Moon and Venus are brighter. You also can get complete fly over schedules at <http://liftoff.msfc.nasa.gov>.

**Pre-retirement
planning seminar,
8:30 a.m.,
Tuesday-
Thursday, Bldg.
4200, Morris
Auditorium**

**Flu shots available
12-3 p.m.
Wednesday, in
Bldg. 4610. For
details, see 'Inside
Marshall'**

Documentation Repository upgrade effective Monday

The Documentation Repository Server hardware and server name is changing Monday. The server name is changing from "msfcmr03" to "repository." This will change the URL for the Repository home page, the MSFC Directives Master List, Technical Standards Library and the Scientific and Technical Information Resources. For more information, or for assistance, call 544-HELP, Option 7.
